

INFINITY BUSINESS SYSTEMS CHOSEN AS FAVORITE PLACE ON GOOGLE

Favorite Places on Google features the most sought out and searched businesses on Google Maps, and Infinity Business Systems has been chosen by users as one of the “Favorite Places on Google.”

Tampa, FL- January 25th, 2010—Infinity Business Systems, the leading provider of IT outsourcing solutions in the Greater Southeast, announced today their designation as a **“Favorite Place on Google”**. Less than 1% of 28 million U.S. businesses have been selected as a "Favorite Place on Google". Favorite Places are decided based on Google Maps listings that receive the most traffic.

Google sends its Favorite Places window stickers with bar codes. Each window decal has a unique bar code, known as a QR code that you can scan with any of hundreds of mobile devices — including iPhone, Android-powered phones, BlackBerry and more — to take consumers directly to that business's Place Page on their mobile phone. Using a mobile phone and these new decals, consumers can easily go up to a storefront and immediately find reviews, get a coupon if the business is offering one or star a business as a place they want to remember for the future. Soon, users will be able to leave a review on the mobile page as well, just like on their desktop.

“We’re honored to be named one of the “Favorite Places on Google,” commented Terry Hedden, CEO of Infinity Business Systems. “Overall, this is pretty exciting for us. Thanks for searching for us and making us a Favorite Place on Google!”

About Infinity Business Systems

Infinity Business Systems is a leading provider of technology consulting and IT management solutions. Infinity’s managed solutions offer clients the comfort of a monthly, fixed price solution with a service model based on preventative maintenance and rapid problem resolution across a client’s entire IT infrastructure. Infinity clients focus on running their business instead of keeping their business running. Infinity’s services include managed services, computer repair, IT consulting, network security, computer monitoring, remote help desk, and computer and network management.
