

Press Release

Ft. Lauderdale, FL – February 18, 2007 – Infinity Business Systems (IBS), a leading provider of technology consulting and Managed IT Services, today announces it has established a physical presence in the Ft. Lauderdale market. The new office is a step forward in the company's ongoing national expansion strategy and will begin servicing local customers from that location immediately.

"We are experiencing a period of aggressive geographic growth, propelled nationally by a set of managed IT service offerings based on preventative maintenance and rapid problem resolution," said Terry Hedden, CEO of IBS. "Our ability to service customers locally in the top 180 U.S. markets will continue to drive our expansion forward."

All national customers can be monitored and serviced through the recent expansion of the company's existing Client Network Operations Center (CNO) at the Tampa, FL headquarters. The CNO allows IBS personnel to proactively monitor, detect and resolve issues, often providing immediate response and reducing or eliminating network downtime. The new Ft. Lauderdale office, as well as all future office expansion locations, will be focused on sales and service of local customers.
