

For Immediate Release

**Infinity Business Systems Opens Atlanta Office as Part of its
Ongoing National Expansion Campaign**

Tampa, FL – November 15, 2007 – Infinity Business Systems (IBS), a leading provider of technology consulting and Managed IT Services, today announces it has established a physical presence in the Atlanta market. The new office is a step forward in the company's ongoing national expansion strategy and will begin servicing local customers from that location immediately.

"We are experiencing a period of aggressive geographic growth, propelled nationally by a set of managed IT service offerings based on preventative maintenance and rapid problem resolution," said Terry Hedden, CEO of IBS. "Our ability to service customers locally in the top 180 U.S. markets will continue to drive our expansion forward."

All national customers can be monitored and serviced through the recent expansion of the company's existing Client Network Operations Center (CNOC) at the Tampa, FL headquarters. The CNOC allows IBS personnel to proactively monitor, detect and resolve issues, often providing immediate response and reducing or eliminating network downtime. The new Atlanta office, as well as all future office expansion locations, will be focused on sales and service of local customers.

"In selecting IBS as our IT service provider, our common goal has been to develop and maintain an IT system that is better managed, has less downtime, is more efficient and is less costly to maintain," said Dominic Sims, COO of the International Code Council. "Ours is a hybrid model of IT support with IBS personnel working hand in hand with the ICC team. This partnership, combined with the IBS service model of prevention and issue resolution has been a perfect fit for the IT needs of our company."

IBS has tapped 20-year IT industry veteran Charlie Perez to be General Manager of the Atlanta office. In his capacity, Charlie will maintain responsibility for regional sales and operations throughout the State of Georgia. "We're fortunate to have an IT executive with Charlie's experience to lead our Atlanta office," continued IBS' CEO Terry Hedden. "His Fortune 100 experience selling IT services and within companies such as Gap Gemini and KPMG, among others, will lend insight and expertise to our customer throughout Georgia."

About Infinity Business Systems

Infinity Business Systems (IBS) is a leading provider of technology consulting and IT management solutions. IBS' managed solutions offer clients the comfort of a monthly, fixed price solution with a service model based on preventative maintenance and rapid problem resolution across a client's entire IT infrastructure. IBS clients focus on running their business instead of keeping their business running. This includes IT strategy management, computer and network management, phone system management, print and copy management and Web site management.
