

**Press Release**

**INFINITY BUSINESS SYSTEMS TAKES ON NEW OFFICE SPACE  
TO SUPPORT CORPORATE GROWTH**

**Tampa, FL – October 11, 2007** – Infinity Business Systems (IBS), a leading provider of technology consulting and Managed IT Services, today announces a move to dramatically increase its office space in the Tampa Bay area. IBS has signed a two year lease in the President's Plaza building in the north Westshore area, occupying 4,800 square feet of space for operations, warehousing and the company's Client Network Operations Center (CNOC).

"The tremendous response we have received from clients to our managed IT service offerings continues to drive both our revenues and our increased capacity needs," said Terry Hedden, CEO of IBS. "Our new space provides a stronger foundation for our business to expand and grow in line with our client's success."

IBS' move will provide it with three times the space held previously. This will enable the company to continue revenue growth of 50-100% annually as it has since 2003. In particular, the Client Network Operations Center will be able to parallel the growth of the company in terms of expertise and logistical space. IBS' Managed IT Services offerings proactively monitors, detects and resolves issues across a client's entire technology infrastructure. Often, IBS personnel detect issues before they impact the stability or security of the business. Should an issue occur, the CNOC provides immediate response, effectively eliminating or reducing network downtime. Traditionally, clients have to wait for problems before receiving assistance. By then it's too late and office productivity and IT performance are already affected.

**About Infinity Business Systems**

Infinity Business Systems (IBS) is a leading provider of technology consulting and IT management solutions. IBS' managed solutions offer clients the comfort of a monthly, fixed price solution with a service model based on preventative maintenance and rapid problem resolution across a client's entire IT infrastructure. IBS clients focus on running their business instead of keeping their business running. This includes IT strategy management, computer and network management, phone system management and Web site management.
